

## C0. Introduction

---

### C0.1

---

#### **(C0.1) Give a general description and introduction to your organization.**

Arcadis is the leading global Design & Consultancy firm for natural and built assets. Applying our deep market sector insights and collective Design, Consultancy, Engineering, Project and Management solutions we work in partnership with our clients to deliver exceptional and sustainable outcomes throughout the lifecycle of their natural and built assets. We are 27,000 people, active in over 70 countries that generate €3.2 billion in revenues. We support UN-Habitat with knowledge and expertise to improve the quality of life in rapidly growing cities around the world.

Our vision has quickly become our passion; improving quality of life. Through our passion, our people and the work we do with our clients, we have opportunities to shape the future of our world, every day. Guided by five core values, combined with five keystone behaviors, we are building a unique, One Arcadis culture. A culture where focusing on our people and working as one team delivers innovation, excellence and client success. Our Values are:

- **People First:** We care for each other and create a safe and respectful working environment where our people can grow, perform, and succeed.
- **Integrity:** We always work to the highest professional and ethical standards and establish trust by being open, honest and responsible.
- **Client Success:** We are passionate about our clients' success and bring insights, agility, and innovation to co-create value.
- **Collaboration:** We value the power of diversity and our global capabilities and deliver excellence by working as One Arcadis.
- **Sustainability:** We base our actions for clients and communities on environmental responsibility and social and economic advancement.

We support our clients' business and create sustainable and exceptional outcomes in all the projects we undertake on their behalf. We offer full lifecycle solutions for clients in most of the major markets including business advisory and consulting, design and engineering and program, project and cost management. We deliver solutions across the entire value chain through the application of design, consultancy, engineering, project and management services. We differentiate ourselves in key market sectors through our market sector insights, by deepening our market sector capabilities and by developing client relationships that span the entire lifecycle of their assets. We work hard to understand the changing needs of our clients and their market sectors to identify new ways to help create value. We design and deliver complex solutions by combining our unique technical, consulting and management skills to provide exceptional and sustainable outcomes for our clients across all phases of asset investments; from planning, through to creation, operation and possible redefinition.

We support our clients on a truly global basis. Our worldwide network is anchored in leading positions in Europe, North America, Latin America, the Middle East, Asia and Australia Pacific. Clients benefit from our strong local presence and our long-term service record on their behalf is rooted in a deep-seated understanding of local market conditions. Through our global business lines, our clients have access to our vast expertise and our ability to provide the best value added solutions and technology.

## C0.2

---

**(C0.2) State the start and end date of the year for which you are reporting data.**

	Start date	End date	Indicate if you are providing emissions data for past reporting years	Select the number of past reporting years you will be providing emissions data for
Row 1	January 1 2017	December 31 2017	Yes	3 years
Row 2	January 1 2016	December 31 2016	<Not Applicable>	<Not Applicable>
Row 3	January 1 2015	December 31 2015	<Not Applicable>	<Not Applicable>
Row 4	January 1 2014	December 31 2014	<Not Applicable>	<Not Applicable>

## C0.3

---

**(C0.3) Select the countries/regions for which you will be supplying data.**

## C0.4

---

**(C0.4) Select the currency used for all financial information disclosed throughout your response.**

EUR

## C0.5

---

**(C0.5) Select the option that describes the reporting boundary for which climate-related impacts on your business are being reported. Note that this option should align with your consolidation approach to your Scope 1 and Scope 2 greenhouse gas inventory.**

Operational control

## C1. Governance

---

### C1.1

---

**(C1.1) Is there board-level oversight of climate-related issues within your organization?**

Yes

### C1.1a

---

**(C1.1a) Identify the position(s) of the individual(s) on the board with responsibility for climate-related issues.**

Position of individual(s)	Please explain
Chief Sustainability Officer (CSO)	Sustainability is an integral part of our strategy and an inherent part of the way we do business. The implementation and performance of our Global Sustainability Policy is led by our Global Director of Sustainability who reports directly to the CEO, where the latter has global responsibility for sustainability matters within Arcadis. In the Supervisory Board, Sustainability is included in the portfolio of responsibilities of its Chairman. The Global Director of Sustainability is supported by a Core Sustainability Team ('CST') that develops the Group-wide sustainability strategy and associated policies, and directs its implementation. The CST also manages the relationships with non-governmental organizations, trade associations, and other network groups to promote and develop sustainable development in the value chains in which our clients and our firm participate.

**C1.1b**

**(C1.1b) Provide further details on the board's oversight of climate-related issues.**

Frequency with which climate-related issues are a scheduled agenda item	Governance mechanisms into which climate-related issues are integrated	Please explain
Scheduled – some meetings	<ul style="list-style-type: none"> <li>Reviewing and guiding strategy</li> <li>Reviewing and guiding major plans of action</li> <li>Reviewing and guiding risk management policies</li> <li>Reviewing and guiding annual budgets</li> <li>Reviewing and guiding business plans</li> <li>Setting performance objectives</li> <li>Monitoring implementation and performance of objectives</li> <li>Overseeing major capital expenditures, acquisitions and divestitures</li> <li>Monitoring and overseeing progress against goals and targets for addressing climate-related issues</li> </ul>	The Executive Board, under the supervision of the Supervisory Board, has overall responsibility for the Arcadis risk management and control systems and has full accountability for strategic risks. Management teams of regional companies and global business lines are responsible for operational performance and effectiveness and for managing the associated risks. The Executive Board, Audit & Risk Committee and the Supervisory Board review the identified strategic and operational risks, including trends annually.

**C1.2**

**(C1.2) Below board-level, provide the highest-level management position(s) or committee(s) with responsibility for climate-related issues.**

Name of the position(s) and/or committee(s)	Responsibility	Frequency of reporting to the board on climate-related issues
Chief Sustainability Officer (CSO)	Both assessing and managing climate-related risks and opportunities	Quarterly
Sustainability committee	Both assessing and managing climate-related risks and opportunities	As important matters arise
Environmental, Health, and Safety manager	Both assessing and managing climate-related risks and opportunities	As important matters arise

## C1.2a

**(C1.2a) Describe where in the organizational structure this/these position(s) and/or committees lie, what their associated responsibilities are, and how climate-related issues are monitored.**

The implementation and performance of our Global Sustainability Policy is led by our Global Director of Sustainability who reports directly to the CEO, where the latter has global responsibility for sustainability matters within Arcadis. In the Supervisory Board, Sustainability is included in the portfolio of responsibilities of its Chairman. The Global Director of Sustainability is supported by a Core Sustainability Team ('CST') that develops the Group-wide sustainability strategy and associated policies, and directs its implementation. The CST also manages the relationships with non-governmental organizations, trade associations, and other network groups to promote and develop sustainable development in the value chains in which our clients and our firm participate.

## C1.3

**(C1.3) Do you provide incentives for the management of climate-related issues, including the attainment of targets?**

Yes

## C1.3a

**(C1.3a) Provide further details on the incentives provided for the management of climate-related issues.**

**Who is entitled to benefit from these incentives?**

Board/Executive board

**Types of incentives**

Recognition (non-monetary)

**Activity incentivized**

Efficiency target

**Comment**

Climate change incentives for individual board members and senior executives can include both monetary and non-monetary recognition.

**Who is entitled to benefit from these incentives?**

Board/Executive board

**Types of incentives**

Recognition (non-monetary)

**Activity incentivized**

Behavior change related indicator

**Comment**

Climate change incentives for individual board members and senior executives can include both monetary and non-monetary

recognition.

**(C2.2a) Select the options that best describe your organization's frequency and time horizon for identifying and assessing climate-related risks.**

	Frequency of monitoring	How far into the future are risks considered?	Comment
Row 1	Annually	>6 years	

**C2.2b**

---

**(C2.2b) Provide further details on your organization's process(es) for identifying and assessing climate-related risks.**

The process for identifying and assessing climate-related risks adheres to the Arcadis Business Controls Framework. The Arcadis Business Control Framework (the ABC Framework) is Arcadis' internal risk and control system, designed and implemented based on the identified twelve key risks which could have an impact on Arcadis' achievement of its strategic goals. The twelve key risks are divided into four risk categories: Strategic, Operational, Health & Safety, and Compliance. Governance standards, global policies, and global guidelines are included in the framework, providing a road map for the management of risk on a day-to-day basis, assisting value creation, and promoting the long-term success of the Company.

The Executive Board has overall responsibility for identifying, analyzing, and managing the risks associated with Arcadis' strategy and activities, including establishing the risk appetite, designing, implementing, and maintaining the internal risk and control system, and monitoring its performance. The Executive Board has established a Risk Management function to provide support and assistance with the effective discharge of these responsibilities. The Risk Management function is headed by the Chief Risk Officer, supported by a Corporate Risk Management team and Regional Risk Managers.

The Risk Management Committee assists the Executive Board with striking the right balance between risk and reward by providing global oversight on risk topics. The Risk Management Committee advises the Executive Board, as needed, in ensuring that a robust risk management framework exists across Arcadis.

The new global on-boarding programme, which inducts new starters on The Arcadis Way, treats risk management as integral to the way we do things at Arcadis. Intelligent risk taking, within the boundaries of our values, is part of our DNA. Soft control surveys are conducted periodically to assess the culture of the company from a risk management perspective and the findings from these surveys are turned into actions – either to close gaps or to share best practices. The outcome of the surveys also helps to improve the clarity of policies and procedures, enhance role modelling of management and obtain deeper understanding of what drives behaviors in relation to compliance and reporting of misconduct.

**C2.2c**

---

**(C2.2c) Which of the following risk types are considered in your organization's climate-related risk assessments?**

	Relevance & inclusion	Please explain
Current regulation	Relevant, always included	In order to serve our client needs and maintain a competitive advantage, Arcadis monitors changes to air quality regulations and limits at the local, national and international levels. Our Technical Knowledge and Innovation (TKI) Community of Practice (CoP) experts responsible for regulatory compliance keep up to date with new regulations and developments on a routine basis, disseminating information to senior management and the organization as a whole.
Emerging regulation	Relevant, always included	In order to serve our client needs and maintain a competitive advantage, Arcadis monitors carbon tax legislation at the local, national and international levels. Our Technical Knowledge and Innovation (TKI) Community of Practice (CoP) experts engaged in carbon tax projects monitor developments on a routine basis, disseminating information to senior management and the organization as a whole. Our service offerings are updated as needed to suit changes in regulation or client needs.
Technology	Relevant, always included	Arcadis stays current with changes in technology to serve our client needs and maintain a competitive advantage. This includes innovations in data tracking, energy efficiency, and sustainable design. Our Technical Knowledge and Innovation (TKI) Community of Practice (CoP) experts monitor developments on a routine basis, disseminating information to senior management and the organization as a whole. Our services are updated as needed to suit changes in technology or client needs.
Legal	Relevant, always included	Arcadis continually monitors climate change activity and legislation at the local, national and international levels, including any changes in international agreements. Doing so allows us to serve our client needs and maintain a competitive advantage. Arcadis has several partnerships and memberships. These include UN Global Compact, UN-Habitat, IUCN Netherlands Leaders for Nature, Carbon Disclosure Project and World Business Council for Sustainable Development. We participate in meetings, taskforces and steering committees in order to demonstrate our sustainability commitments, to find common grounds to address sustainability challenges, to keep up to date with important new developments and to adapt our own sustainability strategy. In 2014, Arcadis became a member of the World Business Council for Sustainable Development (WBCSD). ARCADIS subsidiary RTKL is also a signatory to The China Accord, an industry-led coalition which pledges to plan and design built environments to carbon neutral or high-performance standards in keeping with the ambition of the Chinese authorities to improve the urban environment. We are also engaged in dialogues with leading NGO's, like IUCN and Amnesty International.
Market	Relevant, always included	In order to serve our client needs and maintain a competitive advantage, Arcadis monitors the market for climate related services at the local, national and international levels. This includes increased demand for emissions tracking and reporting, renewable energy, and carbon offsets. Our Technical Knowledge and Innovation (TKI) Community of Practice (CoP) experts monitor developments on a routine basis, disseminating information to senior management and the organization as a whole. Our service offerings are updated as needed to suit changes in market conditions and client needs.
Reputation	Relevant, always included	Whether its helping a water utility deal with drought, designing a building to withstand the effects of climate change, or helping a client improve resource efficiencies, the environment and potential changes to our environment is embedded into everything we do. We strive to provide our clients with comprehensive solutions that provide sustainable benefit their organization and the communities and environments in which we live and work. We do this by monitoring all aspects of climate change by maintaining memberships and partnerships with key organizations, participating in meetings, taskforces and steering committees, and participating in key projects that help shape regulation. Our Technical Knowledge and Innovation (TKI) Community of Practice (CoP) experts keep up to date in their areas of expertise, disseminating any large developments to senior management and individuals responsible for assisting our clients with climate change related matters.
Acute physical	Relevant, always included	As an environmental consulting company, Arcadis already works with many our clients to varying degrees on climate-related issues. Changes in temperature extremes will directly affect many of our clients, at the local, national and international level and could pose a threat to the safety of our staff working in the field or at a project site. Like all climate related issues, this risk driver is specific to geography, as impacts associated with temperature extreme will affect different geographies with different intensities.
Chronic physical	Relevant, always included	As an environmental consulting company, Arcadis already works with many our clients to varying degrees on climate-related issues. Changes in the mean average precipitation will directly affect many of our clients, at the local, national and international level. Like all climate related issues, this risk driver is specific to geography, as impacts associated with precipitation change will affect different geographies with different intensities.
Upstream	Relevant, sometimes included	Understanding greenhouse gas emissions and obtaining reliable and accurate greenhouse gas data serve as a foundation to any carbon reduction efforts. Arcadis engagement with suppliers is prioritized based on Arcadis' largest emitting activities combined with the biggest opportunities to bring about change. To date, efforts to work with Arcadis suppliers have focused on improving data collection practices and encouraging suppliers to offer eco-friendly alternatives.
Downstream	Relevant, always included	As a leader in the environmental space, Arcadis routinely works with clients to comply with environmental regulation, providing our clients with regulatory expertise at the local, state, regional, national, and international level. Changes in environmental regulation will impact a majority if not all of our clients. This risk driver is geographic-specific and sector-specific, linked to the regulation itself. Potential risk impacts include a loss of clients or projects or a tarnished reputation.

**C2.2d**

## **(C2.2d) Describe your process(es) for managing climate-related risks and opportunities.**

Arcadis aspires to understand and act upon our greatest risks, material to our business, our stakeholders, and society. The Arcadis Supervisory Board oversees and advises the Executive Board, which has overall responsibility for risk management. Using the ERM, main risks were identified following comprehensive discussions that included the likelihood of their occurrence and their potential impact.

### RISK PROFILE AND APPETITE

The Executive Board has identified twelve main risks to which we could potentially be exposed in pursuit of our strategy. Our risk appetite in relation to these risks varies from averse to high, reflecting the amount of risk that we are willing to accept. Where risk is unrewarded and we have a limited ability to mitigate and control it, our appetite is averse. For rewarded risks, our appetite ranges from low to high, and higher risks require additional controls. In 2016, macro-economic uncertainty, to an extent driven by geopolitical developments and low oil prices, led to a retraction in spending on the part of governments in several of our operating regions. This has impacted our risk profile. In light of this, we have reviewed our operating model and reorganized some of our regions to ensure that we continue to operate in accordance with our risk appetite.

### REGIONAL RESPONSIBILITY

In the regions and operating companies, local management is responsible for actively identifying, evaluating and managing risks to achieve operational performance. They are assisted by Regional Risk Managers who have a functional reporting line to the Global Chief Risk Officer. A key risk assurance role is carried out by the Regional Risk Managers, who evaluate the effective implementation of the controls which make up the ABC Framework throughout the year. If inadequacies are identified, actions are taken to address any resultant issues, with monitoring thereafter to ensure the controls are designed and operating effectively. Regional Enterprise Risk Registers have been developed during this financial year to further support the regions in identifying and managing their risks.

## C2.3

---

### **(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?**

Yes

## C2.3a

---

### **(C2.3a) Provide details of risks identified with the potential to have a substantive financial or strategic impact on your business.**

#### **Identifier**

Risk 1

#### **Where in the value chain does the risk driver occur?**

Customer

#### **Risk type**

Transition risk

#### **Primary climate-related risk driver**

Policy and legal: Enhanced emissions-reporting obligations

#### **Type of financial impact driver**

Market: Reduced demand for goods and/or services due to shift in consumer preferences

#### **Company- specific description**

Arcadis routinely works with clients to comply with air quality limits and regulations, providing our clients with regulatory compliance support experts whose expansive and diverse client-base keeps them on the cutting edge of the latest local, state, regional, national, and global trends in regulations and technology. As such, changes to air pollution regulations or the imposition or

relaxation of air pollution limits will affect our clients at the local, national, and international levels. This risk driver is geographic-specific and sector-specific, linked to the regulation itself. Potential risk impacts include a loss of clients or projects or a tarnished reputation.

**Time horizon**

Current

**Likelihood**

Virtually certain

**Magnitude of impact**

Medium

**Potential financial impact**

32000000

**Explanation of financial impact**

Order of magnitude estimate. Financial implications will vary. A 1% decrease in our Business Lines largely responsible for addressing regulatory compliance (Environment, Water, and Infrastructure) would decrease revenue by €32m.

**Management method**

In order to serve our client needs and maintain a competitive advantage, Arcadis monitors changes to air quality regulations and limits at the local, national and international levels. Our Technical Knowledge and Innovation (TKI) Community of Practice (CoP) experts responsible for regulatory compliance keep up to date with new regulations and developments on a routine basis, disseminating information to senior management and the organization as a whole.

**Cost of management**

500000

**Comment**

Estimated order of magnitude cost of management is €500,000/year.

**Company- specific description**

Regulation-driven taxes on either fuel or energy already impacts Arcadis clients, particularly in the power sector. Changes to existing legislation or new legislation would affect many of our clients. This risk driver is geographic-specific or regulation-specific. Potential risk impacts include a loss of clients or projects or a tarnished reputation.

**Time horizon**

Current

**Likelihood**

Virtually certain

**Magnitude of impact**

Medium-low

**Potential financial impact**

8000000

**Explanation of financial impact**

Order of magnitude estimate. Financial implications will vary. A 1% decrease in our Environmental Business Line would decrease revenue by €8m.

**Management method**

In order to best serve our clients, Arcadis continually monitors changes in fuel/energy taxes and regulations. Our Technical Knowledge and Innovation (TKI) Community of Practice (CoP) experts working on fuel/energy tax and/or regulation projects monitor developments, disseminating information to senior management and the organization as a whole. Our services are updated

#### **Primary climate-related risk driver**

Policy and legal: Mandates on and regulation of existing products and services

#### **Type of financial impact driver**

Market: Reduced demand for goods and/or services due to shift in consumer preferences

#### **Company- specific description**

Regulations which impose energy or resource efficiency affect Arcadis clients on a routine basis at local, national, and international levels. In addition, many Arcadis clients see the value of energy/resource efficiency, imposing their own set of standards on their projects. Should Arcadis not be familiar with changes in efficiency regulations/standards, we will be limited in our ability to serve our client needs. This risk driver is not geographic-specific or regulation-specific as our practice is global and we serve clients globally on these issues. Potential risk impacts include a loss of clients or projects or a tarnished reputation.

It is difficult to understand and accurately predict all physical risks associated with climate change. While Arcadis offers a full-suite of climate change related services to suite our clients' needs, we also believe in working directly with our clients to help them understand climate change inherent risks and uncertainty. We do this through global information sharing, technical presentations, individual discussions, and facilitated workshops.

**Magnitude of impact**

Medium

**Potential financial impact**

32000000

**Explanation of financial impact**

Order of magnitude estimate. Financial implications will vary. A 1% decrease in our business would decrease revenue by €32m.

**Management method**

Whether its helping a water utility deal with drought, designing a building to withstand the effects of climate change, or helping a client improve resource efficiencies, the environment and potential changes to our environment is embedded into everything we do. We strive to provide our clients with comprehensive solutions that provide sustainable benefit their organization and the communities and environments in which we live and work. We do this by monitoring all aspects of climate change by maintaining memberships and partnerships with key organizations, participating in meetings, taskforces and steering committees, and participating in key projects that help shape regulation. Our Technical Knowledge and Innovation (TKI) Community of Practice (CoP) experts keep up to date in their areas of expertise, disseminating any large developments to senior management and individuals responsible for assisting our clients with climate change related matters.

**Strategy to realize opportunity**

Arcadis continually monitors climate change activity and legislation at the local, national and international levels, including any changes in international agreements. Doing so allows us to serve our client needs and maintain a competitive advantage. Arcadis has several partnerships and memberships. These include UN Global Compact, UN-Habitat, IUCN Netherlands Leaders for Nature, Carbon Disclosure Project, World Economic Forum, and World Business Council for Sustainable Development. We participate in meetings, taskforces and steering committees in order to demonstrate our sustainability commitments, to find common grounds to address sustainability challenges, to keep up to date with important new developments and to adapt our own sustainability strategy. In 2014, ARCADIS became a member of the World Business Council for Sustainable Development (WBCSD). ARCADIS subsidiary RTKL is also a signatory to The China Accord, an industry-led coalition which pledges to plan and design built environments to carbon neutral or high-performance standards in keeping with the ambition of the Chinese authorities to improve the urban environment. We are also engaged in dialogues with leading NGO's, like IUCN and Amnesty International.

Arcadis offers its clients' a full suite of climate change related services including climate change modeling, energy efficiency, resource conservation, flood and coastal protection, water management, and disaster preparedness. By offering a wide range of climate related services, staying up to date on potential impacts of climate change, working on a wide variety of projects in Water, Environment, Infrastructure, and Buildings, and global information sharing, Arcadis will continue to be positioned to serve our clients' needs. Arcadis continually monitors climate change activity by maintaining memberships and partnerships with organizations, participating in meetings, taskforces and steering committees, and participating in key projects that help shape regulation. Our Technical Knowledge and Innovation (TKI) Community of Practice (CoP) experts keep up to date with new developments on a routine basis, disseminating any uncertainty to senior management and individuals responsible for informing our clients on climate change related issues.

Markets

#### **Primary climate-related opportunity driver**

Access to new markets

#### **Type of financial impact driver**

Increased revenues through access to new and emerging markets (e.g., partnerships with governments, development banks)

#### **Company- specific description**

Arcadis is a consulting company that is deeply involved in providing expertise to clients on a variety of environmental topics including climate change. Arcadis has the opportunity to increase its reputation in our marketplace by enhancing our ability to serve clients at a high performance level for issues associated with climate change.

#### **Time horizon**

Current

#### **Likelihood**

Virtually certain

#### **Magnitude of impact**

Medium

#### **Potential financial impact**

32000000

#### **Explanation of financial impact**

Order of magnitude estimate. Financial implications will vary. A 1% increase in our business would increase revenue by €32m.

#### **Strategy to realize opportunity**

Whether its helping a water utility deal with drought, designing a building to withstand the effects of climate change, or helping a client improve resource efficiencies, the environment and potential changes to our environment is embedded into everything we do. We strive to provide our clients with comprehensive solutions that provide sustainable benefit their organization and the communities and environments in which we live and work. We do this by monitoring all aspects of climate change by maintaining memberships and partnerships with key organizations, participating in meetings, taskforces and steering committees, and participating in key projects that help shape regulation. Our Technical Knowledge and Innovation (TKI) Community of Practice (CoP) experts keep up to date in their areas of expertise, disseminating any large developments to senior management and individuals responsible for assisting our clients with climate change related matters.

#### **Cost to realize opportunity**

1000000

#### **Comment**

Estimated order of magnitude cost of management is €1,000,000/year.

---

## C2.5

### (C2.5) Describe where and how the identified risks and opportunities have impacted your business.

	Impact	Description
Products and services	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have increased demand for engineering services (e.g., sustainable design, increased energy efficiency).
Supply chain and/or value chain	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have improved communication between Arcadis and its supply chain (up and downstream).
Adaptation and mitigation activities	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have increased demand from our clients for more sustainable design.
Investment in R&D	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have increased client demand for sustainable design driving investment in R&D and innovation.
Operations	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have improved Arcadis internal operations and carbon footprint.
Other, please specify	Please select	

## C2.6

### (C2.6) Describe where and how the identified risks and opportunities have factored into your financial planning process.

	Relevance	Description
Revenues	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have increased revenue through climate related engineering services.
Operating costs	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have decreased operational costs through internal environmental conservation initiatives.
Capital expenditures / capital allocation	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have been used to inform decisions concerning capital expenditures / capital allocation.
Acquisitions and divestments	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have been used to inform decisions concerning acquisitions and divestments.
Access to capital	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have been used to inform decisions concerning access to capital.
Assets	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have been used to inform decisions concerning assets.
Liabilities	Impacted for some suppliers, facilities, or product lines	Climate risks and opportunities have been used to inform decisions concerning liabilities.
Other	Please select	

## C3. Business Strategy

### C3.1

#### (C3.1) Are climate-related issues integrated into your business strategy?

Yes

#### C3.1a

#### (C3.1a) Does your organization use climate-related scenario analysis to inform your business strategy?

Yes, qualitative and quantitative

### C3.1c

---

**(C3.1c) Explain how climate-related issues are integrated into your business objectives and strategy.**

At a global-level, our Strategy is formally updated on a three-year cycle, with annual review and consideration of short-term changes, if any are required.

#### CLIMATE CHANGE

Arcadis has broad consulting capabilities related to climate change. This ranges from strategy development and carbon footprint reporting to consulting on preventing or reducing the causes of climate change. The Paris climate accord represents a significant opportunity for Arcadis, as it requires both governments and private companies to take steps to significantly reduce carbon outputs over the next decades.

In response to this development, Arcadis developed a Sustainability and Climate Change strategy within our strategic environmental consulting activities. This bundles our sustainability and climate change activities under a combined offer, thereby creating better access to these capabilities for clients, and more visibility for our extensive knowledge base in this area. Our strength in sustainability and climate change consulting mainly lies in helping clients address these issues in their operations to create a lasting positive impact. This can range from climate change mitigation strategies in supply chains and energy efficiency solutions in industrial processes, all the way through to embedded carbon analysis in material choices and energy efficient designs in buildings and infrastructure.

For many of our industrial clients, climate change has a major impact on their assets and liabilities. Given the consulting nature of our activities, this impact is negligible for Arcadis and therefore not listed as a risk to the firm, but rather as an opportunity. However, where possible, the Company is addressing climate change in its operations through actions directed at reducing its carbon footprint.

### C3.1d

---

**(C3.1d) Provide details of your organization's use of climate-related scenario analysis.**

Climate-related scenarios	Details
Other, please specify (Situation dependent, see details)	Intelligent risk management plays a vital role in enabling Arcadis to achieve its long-term strategic objectives. After potential risks are identified, they are analyzed to determine the likelihood and magnitude of impact to the organization. The process for analyzing climate related risks varies and could include any or all of the following: literature reviews, market studies, materiality assessments, and/or desktop evaluations / modeling.

## C4. Targets and performance

---

### C4.1

---

**(C4.1) Did you have an emissions target that was active in the reporting year?**

Absolute target

## C4.1a

---

**(C4.1a) Provide details of your absolute emissions target(s) and progress made against those targets.**

**Target reference number**

Abs 1

**Scope**

Scope 1 +2 (market-based)

**% emissions in Scope**

21

**% reduction from base year**

30

**Base year**

2010

**Start year**

2012

**Base year emissions covered by target (metric tons CO2e)**

8348

**Target year**

2020

**Is this a science-based target?**

No, but we anticipate setting one in the next 2 years

**% achieved (emissions)**

100

**Target status**

Underway

**Please explain**

Arcadis' global position on targets focuses on a process of continuous improvement within its environmental metrics, similar to that done in our Health & Safety approach (with considerable success). In 2015, the Netherlands achieved its 2012-2015 emissions reduction goals previously set and updated its goals to reflect a longer term vision of continuous improvement (30% reduction compared against its 2010 baseline year). In 2016, Arcadis began assessing whether these rigorous goals aligned with science-based targets which is anticipated to continue into 2018. To date, the Netherlands achieved its goal (50% reduction compared against its 2010 baseline year).

---

## C4.2

**KPI in target year**

100

**% achieved in reporting year**

84

**Target Status**

Underway

**Please explain**

In recent years Arcadis Netherlands and some other countries in the region have been purchasing part of its electricity from “Green” sources. Green Power is, in the case of Netherlands, power from wind energy with the Dutch environmental quality label for sustainable products and services (SMK). In 2014 this was approximately 42% of the total amount of electricity purchased. For 2020 the ambition is to consume 100% Green Power (with quality label) of which a portion will be self-generated. In 2017, Arcadis Netherlands consumed 84% green electricity of which 3% was self-generated.

**Part of emissions target**

**Is this target part of an overarching initiative?**

Please select

**C4.3**

**(C4.3) Did you have emissions reduction initiatives that were active within the reporting year? Note that this can include those in the planning and/or implementation phases.**

Yes

**C4.3a**

**(C4.3a) Identify the total number of projects at each stage of development, and for those in the implementation stages, the estimated CO2e savings.**

	Number of projects	Total estimated annual CO2e savings in metric tonnes CO2e (only for rows marked *)
Under investigation	5	66000
To be implemented*	8	4000
Implementation commenced*	8	8000
Implemented*	2	4000
Not to be implemented	0	

## C4.3b

---

**(C4.3b) Provide details on the initiatives implemented in the reporting year in the table below.**

**Payback period**

<1 year

**Estimated lifetime of the initiative**

Ongoing

**Comment**

REDUCING EMPLOYEE COMMUTING Arcadis encourages its employees to cycle, walk, and carpool to work and hold virtual meetings when possible. The estimated savings is based on activities within the Arcadis reporting boundaries and does not include emissions from employees commuting. Monetary savings and investments are order of magnitude estimates. Depending on the region and specific program, employees can receive incentives when alternative forms of travel are used. Some employees also take advantage of working from home, eliminating the use of transport all together. Commuting to and from work is not included within the ARCADIS reporting boundaries but does result in overall emission reductions. When possible, new offices are located near rail stations and easily accessible through use of public transport. Home working is supported through the agile working set up. The utilization of video and tele-conferencing is encouraged and facilities are accessible across all offices. In the Netherlands, the CARS project was started. Through the intranet employees can see where colleagues live and are going and whether they could travel together. A variety of similar initiatives are in varying stages of implementation throughout the organization.

SUSTAINABLE OFFICES Arcadis incorporates energy reduction principles into the work place by embarking on an office program centered around environmental sustainability and creating a positive working environment for employees. The program identifies key components of environmental sustainability that should be considered when leasing new office spaces. The estimated savings is based on Scope 2 activities but is likely to have benefits on Scope 1 and 3 activities (reduce travel) as well. Monetary savings and investments are order of magnitude estimates. Many factors are considered when selecting building locations including proximity to clients and employee residences. A variety of similar initiatives are in varying stages of implementation throughout the organization.

LEASING GREENER VEHICLES Some Arcadis office lease company vehicles. Working in collaboration with the leasing organizations, Arcadis strives for a fuel efficient fleet by offering management incentives to lease fuel efficient vehicles. In some cases, a "tax" is placed on vehicles with low fuel efficiencies. The surcharge is levied in addition to the individual's personal contribution and ranges from €30 to €120, depending on the vehicle's energy label. Other office are working to offer employees greener choices when hiring vehicles. The estimated savings is based on Scope 1 activities. Monetary savings and investments are order of magnitude estimates. A variety of similar initiatives are in varying stages of implementation throughout the organization.

**Comment**

PAPER REDUCTION AND OFFICE RECYCLING Employees are encouraged to print only as needed and double-sided. The reduction effort also encourages employees to work with clients to produce electronic reports and invoices. The plan also includes review and rationalization of printers, replacing older machines with more efficient newer models. Systems are in place to collate and report accurate paper usage and spend, the data are used to establish a benchmark and reported internally. New recycling programs are being implemented throughout Arcadis offices every year. The number of offices with recycling programs continues to increase along with the number of items that can be recycled (i.e., batteries and e-waste). These emission reductions do not fall within the Arcadis reporting boundaries but result in emission reductions. Annual carbon savings from paper reduction efforts has been estimated but due to the magnitude of emissions, is not included within Arcadis Scope 3 reporting boundaries at this time. Monetary savings and investments are order of magnitude estimates. A variety of similar initiatives are in varying stages of implementation throughout the organization.

**Comment**

RENEWABLE ENERGY PURCHASE / CONSUMPTION Some offices and operating companies set goals to purchase a portion of their energy from renewable energy suppliers. Additionally, some offices elect to generate renewable energy onsite. These initiatives are site-specific. Arcadis Netherlands and other countries and offices purchase green power. Arcadis Netherlands purchases SMK certified green power. Arcadis is in the process of reviewing other green purchase agreements to verify conformance with green energy standards. Indirect monetary savings and investments are order of magnitude estimates.

**(C4.5a) Provide details of your products and/or services that you classify as low-carbon products or that enable a third party to avoid GHG emissions.**

**Level of aggregation**

Group of products

**Description of product/Group of products**

Arcadis works with our clients to solve some of the biggest issues facing our world – megatrends that impact us all – such as sustainability, urbanization, asset productivity, resource scarcity, and climate change. We do that by delivering comprehensive solutions that provide sustainable benefit to our clients, and the communities and environments in which we live and work. Often the solutions enable our clients' GHG emissions to be reduced or avoided. Our Water Business Line focuses on providing clients with the most energy-efficient water supply, transmission, treatment, recycling and discharge systems to our clients. Where feasible, we incorporate energy efficient pumps into our water designs. Our Water Business line also works with wastewater clients to capture and burn methane emissions generated from wastewater treatment processes. In our Environment Business Line, we assist clients in developing climate strategies and inventories for quantifying and addressing emission sources (carbon footprinting). In many cases, this involves switching to cleaner sources of energy and improving the efficiency of industrial processes. In our Buildings Business Line, we provide our clients with energy efficiency expertise and Sustainable Design of Buildings in recognition of LEED and other National sustainable design concepts. Providing renewable energy (e.g., wind, hydroelectric, solar, biomass) expertise and design services has helped clients move to more sustainable energy sources for their processes. In the UK, a dedicated sustainability team and Whole Life Costing team work across industry sectors and with a range of clients seeking to understand the whole life carbon and cost implications of different materials and building specifications. The teams support clients by helping them understand the cost and material impact of decisions they make. This team has also developed a "dual-currency" model that explicitly focuses on the carbon and cost impact of different building systems. At present, Arcadis quantifies avoided emissions as warranted by specific projects. Arcadis has started collaborating with some of its clients to offset emissions resulting from project-related work. The generation of CERs or ERUs within the framework of CDM or JI (UNFCCC) has not been considered at the corporate level at present.

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Emissions resulting from waste generated in operations are estimated to be de minimis and not included within Arcadis reporting boundaries.

## Business travel

### Evaluation status

Relevant, calculated

### Metric tonnes CO2e

31933

### Emissions calculation methodology

The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition) and WBCSD Corporate Value Chain (Scope 3) Accounting and Reporting Standard

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

90

### Explanation

Arcadis includes emissions associated with business travel from rental cars, reimbursed personal vehicles, air travel, and the use of public transportation in its Scope 3 emission calculations.

## Employee commuting

### Evaluation status

Not relevant, explanation provided

### Metric tonnes CO2e

### Emissions calculation methodology

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Emissions resulting from employee commuting are not included within Arcadis reporting boundaries (operational control).

## Upstream leased assets

### Evaluation status

Not relevant, explanation provided

### Metric tonnes CO2e

### Emissions calculation methodology

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Emissions resulting from leased assets are included in Arcadis' Scope 2 reporting boundaries (operational control).

## Downstream transportation and distribution

### Evaluation status

Not relevant, explanation provided

### Metric tonnes CO2e

### Emissions calculation methodology

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Emissions resulting from package delivery is tracked in United States but are not included within Arcadis reporting boundaries at this time (de minimis).

## Processing of sold products

### Evaluation status

Not relevant, explanation provided

### Metric tonnes CO2e

### Emissions calculation methodology

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Emissions resulting from processing of sold products are estimated to be de minimis and are not included within Arcadis reporting boundaries.

## Use of sold products

### Evaluation status

Relevant, not yet calculated

### Metric tonnes CO2e

### Emissions calculation methodology

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Emissions resulting from Arcadis-designed infrastructure are tracked on a project by project basis as requested by clients but are not included within Arcadis reporting boundaries at this time.

## End of life treatment of sold products

### Evaluation status

Relevant, not yet calculated

### Metric tonnes CO2e

### Emissions calculation methodology

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Emissions resulting from end of life treatment of Arcadis-designed infrastructure are not included within Arcadis reporting boundaries at this time.

## Downstream leased assets

### Evaluation status

Not relevant, explanation provided

### Metric tonnes CO2e

### Emissions calculation methodology

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Any assets leased through Arcadis are estimated to be de minimis and not included in the Arcadis reporting boundaries.

## Franchises

### Evaluation status

Not relevant, explanation provided

### Metric tonnes CO2e

### Emissions calculation methodology

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Arcadis is not a franchise organization.

## Investments

### Evaluation status

Not relevant, explanation provided

### Metric tonnes CO2e

### Emissions calculation methodology

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Emissions resulting from investments are estimated to be de minimis and are not included in Arcadis reporting boundaries.

## Other (upstream)

### Evaluation status

### Metric tonnes CO2e

### Emissions calculation methodology

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

### Explanation

Other (downstream)

Evaluation status

Metric tonnes CO2e

Emissions calculation methodology

Percentage of emissions calculated using data obtained from suppliers or value chain partners

Explanation

C6.7

---

**(C6.7) Are carbon dioxide emissions from biologically sequestered carbon relevant to your organization?**

Yes

C6.7a

---

**(C6.7a) Provide the emissions from biologically sequestered carbon relevant to your organization in metric tons CO2.**

65

C6.10

---

**(C6.10) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.**

**Intensity figure**

0.0000103

**Metric numerator (Gross global combined Scope 1 and 2 emissions)**

33168

**Metric denominator**

unit total revenue

**Metric denominator: Unit total**

3219000000

**Scope 2 figure used**

Market-based

**% change from previous year**

0

**Direction of change**

No change

**Reason for change**

Emissions and revenue decreased proportionally (3%)

---

**Intensity figure**

1.21

**Metric numerator (Gross global combined Scope 1 and 2 emissions)**

33168

**Metric denominator**

full time equivalent (FTE) employee

**Metric denominator: Unit total**

27327

**Scope 2 figure used**

Market-based

**% change from previous year**

4

**Direction of change**

Decreased

**Reason for change**

The average number of employees increased by 1 percent while Scope 1 and 2 emissions decreased by 3 percent due to decreased revenue and emission reduction activities implemented during the year primarily through increased office space utilization and efforts to reduce travel.

---

## C7. Emissions breakdowns

---

### C7.1

---

**(C7.1) Does your organization have greenhouse gas emissions other than carbon dioxide?**

Yes

## C7.1a

---

**(C7.1a) Break down your total gross global Scope 1 emissions by greenhouse gas type and provide the source of each used greenhouse warming potential (GWP).**

Greenhouse gas	Scope 1 emissions (metric tons of CO2e)	GWP Reference
CO2	12112	IPCC Second Assessment Report (SAR - 100 year)
CH4	13	IPCC Second Assessment Report (SAR - 100 year)
N2O	39	IPCC Second Assessment Report (SAR - 100 year)
HFCs	0	IPCC Second Assessment Report (SAR - 100 year)
PFCs	0	IPCC Second Assessment Report (SAR - 100 year)
SF6	0	IPCC Second Assessment Report (SAR - 100 year)
NF3	0	IPCC Second Assessment Report (SAR - 100 year)

## C7.2

---

**(C7.2) Break down your total gross global Scope 1 emissions by country/region.**

Country/Region	Scope 1 emissions (metric tons CO2e)
Belgium	1377
Brazil	69
Chile	0
France	533
Germany	1134
Netherlands	3775
Czechia	72
Poland	245
United Kingdom of Great Britain and Northern Ireland	441
North America	3988
Australia	254
Middle East	6
Other, please specify (Asia)	270

## C7.3

---

**(C7.3) Indicate which gross global Scope 1 emissions breakdowns you are able to provide.**

By business division

By activity

## C7.3a

---

**(C7.3a) Break down your total gross global Scope 1 emissions by business division.**

Business division	Scope 1 emissions (metric ton CO2e)
Asia	271
Australia	254
Europe	7576
Latin America	69
Middle East	6
North America	3983
CallisonRTKL	5

**C7.3c**

**(C7.3c) Break down your total gross global Scope 1 emissions by business activity.**

Activity	Scope 1 emissions (metric tons CO2e)
Leased vehicle travel for business purposes	10774
Leased vehicle travel for office commuting and personal reasons	1390

**C7.5**

**(C7.5) Break down your total gross global Scope 2 emissions by country/region.**

Country/Region	Scope 2, location-based (metric tons CO2e)	Scope 2, market-based (metric tons CO2e)	Purchased and consumed electricity, heat, steam or cooling (MWh)	Purchased and consumed low-carbon electricity, heat, steam or cooling accounted in market-based approach (MWh)
Belgium	140	117		
Brazil	262	262		
Chile	309	309		
France	59	38		
Germany	356	235		
Netherlands	1636	444		
Czechia	24	24		
Poland	61	61		
United Kingdom of Great Britain and Northern Ireland	1803	1803		
North America	13645	13645		
Australia	848	848		
Other, please specify (Asia)	2943	2943		
Middle East	276	276		

**C7.6**

**(C7.6) Indicate which gross global Scope 2 emissions breakdowns you are able to provide.**

- By business division
- By activity

## C7.6a

---

**(C7.6a) Break down your total gross global Scope 2 emissions by business division.**

Business division	Scope 2, location-based emissions (metric tons CO2e)	Scope 2, market-based emissions (metric tons CO2e)
Asia	2348	2348
Australia	848	848
Europe	3874	2425
Latin America	571	571
Middle East	276	276
North America	10288	10288
CallisonRTKL	4249	4249

## C7.6c

---

**(C7.6c) Break down your total gross global Scope 2 emissions by business activity.**

Activity	Scope 2, location-based emissions (metric tons CO2e)	Scope 2, market-based emissions (metric tons CO2e)
Electricity consumption	22453	21004

## C7.9

---

**(C7.9) How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to those of the previous reporting year?**

Decreased

## C7.9a

---

**(C7.9a) Identify the reasons for any change in your gross global emissions (Scope 1 and 2 combined) and for each of them specify how your emissions compare to the previous year.**

	Change in emissions (metric tons CO2e)	Direction of change	Emissions value (percentage)	Please explain calculation
Change in renewable energy consumption	725	Decreased	2	Increase in renewable energy consumption decreased emissions by 725 MT CO2e (2%).
Other emissions reduction activities	300	Decreased	1	Due to emission reduction activities implemented throughout the year, emissions have not grown as high as could be expected. Last year, an estimated 300 tCO2e were reduced by our Scope 1 and 2 emissions reduction projects (300 / 34,407 * 100 = 2%).
Divestment	0	No change	0	As per the GHG protocol, the baseline and previous reporting years were updated for any divestments that occurred in 2017. As per the protocol, previous reporting years were NOT updated as a result of organic growth.
Acquisitions	0	No change	0	As per the GHG protocol, the baseline and previous reporting years emissions were updated acquisitions that occurred in 2017. As per the protocol, previous reporting years were NOT updated as a result of organic growth.
Mergers	0	No change	0	As per the GHG protocol, the baseline and previous reporting years were updated for any mergers that occurred in 2017. As per the protocol, previous reporting years were NOT updated as a result of organic growth.
Change in output	214	Decreased	1	In 2017, remaining decrease in emissions was attributed change in output (34,407 - 33,168 - 725 - 300 = 214 tCO2e or 1%).
Change in methodology	0	No change	0	As per the GHG protocol, the baseline and previous reporting years were updated for any change in methodology that occurred in 2017. As per the protocol, previous reporting years were NOT updated as a result of organic growth.
Change in boundary	0	No change	0	The reporting methodology remained the same in 2017.
Change in physical operating conditions	0	No change	0	The reporting methodology remained the same in 2017.
Unidentified		<Not Applicable>		
Other		<Not Applicable>		

**C7.9b**

**(C7.9b) Are your emissions performance calculations in C7.9 and C7.9a based on a location-based Scope 2 emissions figure or a market-based Scope 2 emissions figure?**

Market-based

**C8. Energy**

**C8.1**

**(C8.1) What percentage of your total operational spend in the reporting year was on energy?**

More than 0% but less than or equal to 5%

**C8.2**

**(C8.2) Select which energy-related activities your organization has undertaken.**

	Indicate whether your organization undertakes this energy-related activity
Consumption of fuel (excluding feedstocks)	Yes
Consumption of purchased or acquired electricity	Yes
Consumption of purchased or acquired heat	Yes
Consumption of purchased or acquired steam	Yes
Consumption of purchased or acquired cooling	Yes
Generation of electricity, heat, steam, or cooling	Yes

**C8.2a**

**(C8.2a) Report your organization's energy consumption totals (excluding feedstocks) in MWh.**

	Heating value	MWh from renewable sources	MWh from non-renewable sources	Total MWh
Consumption of fuel (excluding feedstock)	HHV (higher heating value)	436	54771	55207
Consumption of purchased or acquired electricity	<Not Applicable>	3370	39430	42800
Consumption of purchased or acquired heat	<Not Applicable>	0	300	300
Consumption of purchased or acquired steam	<Not Applicable>	0	300	300
Consumption of purchased or acquired cooling	<Not Applicable>	0	600	600
Consumption of self-generated non-fuel renewable energy	<Not Applicable>	119	<Not Applicable>	119
Total energy consumption	<Not Applicable>	3925	95401	99326

**C8.2b**

**(C8.2b) Select the applications of your organization's consumption of fuel.**

	Indicate whether your organization undertakes this fuel application
Consumption of fuel for the generation of electricity	No
Consumption of fuel for the generation of steam	No
Consumption of fuel for the generation of cooling	No
Consumption of fuel for co-generation or tri-generation	No

**C8.2c**

**(C8.2c) State how much fuel in MWh your organization has consumed (excluding feedstocks) by fuel type.**

**Fuels (excluding feedstocks)**

Motor Gasoline

**Heating value**

HHV (higher heating value)

**Total fuel MWh consumed by the organization**

35803

**MWh fuel consumed for the self-generation of electricity**

<Not Applicable>

**MWh fuel consumed for self-generation of heat**

<Not Applicable>

**MWh fuel consumed for self-generation of steam**

## C8.2e

---

**(C8.2e) Provide details on the electricity, heat, steam, and cooling your organization has generated and consumed in the reporting year.**

	Total Gross generation (MWh)	Generation that is consumed by the organization (MWh)	Gross generation from renewable sources (MWh)	Generation from renewable sources that is consumed by the organization (MWh)
Electricity	119	119	119	119
Heat	0	0	0	0
Steam	0	0	0	0
Cooling	0	0	0	0

## C8.2f

---

**(C8.2f) Provide details on the electricity, heat, steam and/or cooling amounts that were accounted for at a low-carbon emission factor in the market-based Scope 2 figure reported in C6.3.**

**Basis for applying a low-carbon emission factor**

Power Purchase Agreement (PPA) with energy attribute certificates

**Low-carbon technology type**

Other low-carbon technology, please specify (Renewable mix)

**MWh consumed associated with low-carbon electricity, heat, steam or cooling**

3251

**Emission factor (in units of metric tons CO<sub>2</sub>e per MWh)**

0

**Comment**

SMK certified renewable energy in Netherlands; renewable energy purchases in Germany and France as well

---

**Basis for applying a low-carbon emission factor**

Other, please specify (Self-generated solar)

**Low-carbon technology type**

Solar PV

**MWh consumed associated with low-carbon electricity, heat, steam or cooling**

119

**Emission factor (in units of metric tons CO<sub>2</sub>e per MWh)**

0

**Comment**

self-generated power in Netherlands

---

**C10.2**

**(C10.2) Do you verify any climate-related information reported in your CDP disclosure other than the emissions figures reported in C6.1, C6.3, and C6.5?**

Yes

---

**C10.2a**

**(C10.2a) Which data points within your CDP disclosure have been verified, and which verification standards were used?**

Disclosure module verification relates to	Data verified	Verification standard	Please explain
C4. Targets and performance	Other, please specify (All of the above)	ISO 50001	Arcadis Netherlands verifies its energy goal, inventory, metrics, and reduction initiatives in accordance with ISO 50001. NETHERLANDS_Certificaat ISO 50001 ANL.PDF
C8. Energy	Other, please specify (All of the above)	ISO 50001	Arcadis Netherlands verifies its energy goal, inventory, metrics, and reduction initiatives in accordance with ISO 50001. NETHERLANDS_Certificaat ISO 50001 ANL.PDF

---

**C11. Carbon pricing**

---

**C11.1**

**(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?**

No, and we do not anticipate being regulated in the next three years

---

**C11.2**

**(C11.2) Has your organization originated or purchased any project-based carbon credits within the reporting period?**

Yes

## C11.2a

---

**(C11.2a) Provide details of the project-based carbon credits originated or purchased by your organization in the reporting period.**

**Credit origination or credit purchase**

Credit purchase

**Project type**

Other, please specify (Renewable energy and methane capture)

**Project identification**

Carbonfund, a non-profit organization supports and develops a variety of carbon projects from around the world, all certified, verified, and/or audited to third-party certification standards. Third-party standards include the United Nations Clean Development Mechanism, Climate Action Reserve, Verified Carbon Standard, Climate, Community and Biodiversity Standards, and American Carbon Registry.

**Verified to which standard**

CDM (Clean Development Mechanism)

**Number of credits (metric tonnes CO<sub>2</sub>e)**

109.37

**Number of credits (metric tonnes CO<sub>2</sub>e): Risk adjusted volume**

109.37

**Credits cancelled**

Yes

**Purpose, e.g. compliance**

Voluntary Offsetting

---

## C11.3

---

**(C11.3) Does your organization use an internal price on carbon?**

Yes

## C11.3a

---

**(C11.3a) Provide details of how your organization uses an internal price on carbon.**

**Objective for implementing an internal carbon price**

Change internal behavior  
Drive energy efficiency  
Drive low-carbon investment  
Supplier engagement

**GHG Scope**

Scope 1  
Scope 2  
Scope 3

**Application**

At present, an internal price of carbon is used primary as a planning tool to guide decision making at the regional or project level.

**Actual price(s) used (Currency /metric ton)**

13

**Variance of price(s) used**

static for planning purposes at this time

**Type of internal carbon price**

Shadow price  
Offsets

**Impact & implication**

To date, carbon pricing has not driven business decision at the global level but remains a valuable planning tool. Carbon pricing has had some success at the regional and project levels driving renewable energy purchases and carbon offsets for select projects.

---

**C12. Engagement**

---

**C12.1**

---

**(C12.1) Do you engage with your value chain on climate-related issues?**

Yes, our suppliers  
Yes, our customers

**C12.1a**

---

**(C12.1a) Provide details of your climate-related supplier engagement strategy.**

**Type of engagement**

Information collection (understanding supplier behavior)

**Details of engagement**

Collect climate change and carbon information at least annually from suppliers

**% of suppliers by number**

10

**% total procurement spend (direct and indirect)**

5

**% Scope 3 emissions as reported in C6.5**

60

**Rationale for the coverage of your engagement**

Arcadis engagement with suppliers is prioritized based on Arcadis' largest emitting activities combined with the biggest opportunities to bring about change. To date, efforts to work with Arcadis suppliers have focused on improving data collection

---

practices and encouraging suppliers to offer eco-friendly alternatives.

#### **Impact of engagement, including measures of success**

Two of the largest emitting activities within the Arcadis organizational boundaries are vehicle emissions and indirect electricity emissions. Since 2008, Arcadis has been working with suppliers to provide green vehicle options and obtain accurate data for which emissions can be calculated. While obtaining utility data from property managers in Europe is rather routine, Arcadis continues to struggle to obtain electricity and fuel data for some of its leased offices. Letters and phone calls have had limited success, but despite these efforts, Arcadis still relies on default electricity intensity factors for some of its offices. Arcadis is also in the process of taking the initiative to incorporate green standards into some of its building contracts. While these initiatives are still in the development phase, Arcadis hopes they will encourage property managers to focus more on energy, water efficiency and the environment in general. Arcadis also continues to increase the number of LEED-certified buildings it leases to reduce its Scope 2 emissions. Globally, Arcadis uses the accuracy of its climate data to measure the success of its supplier engagement. While data accuracy continues to improve each year, more efforts are needed to engage suppliers.

#### **Comment**

Percentages cited above are not tracked at the global level. Estimates are provided based on known regional efforts and initiatives to collect climate change related information.

---

#### **Type of engagement**

Engagement & incentivization (changing supplier behavior)

#### **Details of engagement**

Offer financial incentives for suppliers who reduce your operational emissions (Scopes 1 & 2)

Offer financial incentives for suppliers who reduce your downstream emissions (Scopes 3)

Offer financial incentives for suppliers who reduce your upstream emissions (Scopes 3)

#### **% of suppliers by number**

10

#### **% total procurement spend (direct and indirect)**

5

#### **% Scope 3 emissions as reported in C6.5**

60

#### **Rationale for the coverage of your engagement**

Arcadis engagement with suppliers is prioritized based on Arcadis' largest emitting activities combined with the biggest opportunities to bring about change. To date, efforts to work with Arcadis suppliers have focused on improving data collection practices and encouraging suppliers to offer eco-friendly alternatives.

#### **Impact of engagement, including measures of success**

Two of the largest emitting activities within the Arcadis organizational boundaries are vehicle emissions and indirect electricity emissions. Since 2008, Arcadis has been working with suppliers to provide green vehicle options and obtain accurate data for which emissions can be calculated. Arcadis continues to increase the number of LEED-certified buildings, awarding lease contracts to property managers who offer green building options. The same is true for office supply and travel companies that offer green options. Accuracy of climate data and reduced emissions are used as a measure of success.

#### **Comment**

Percentages cited above are not tracked at the global level. Estimates are provided based on known regional efforts and initiatives to collect climate change related information.

---

#### **Type of engagement**

Innovation & collaboration (changing markets)

#### **Details of engagement**

Run a campaign to encourage innovation to reduce climate impacts on products and services

#### **% of suppliers by number**

10

#### **% total procurement spend (direct and indirect)**

5

#### **% Scope 3 emissions as reported in C6.5**

60

#### **Rationale for the coverage of your engagement**

Arcadis engagement with suppliers is prioritized based on Arcadis' largest emitting activities combined with the biggest

---

opportunities to bring about change. To date, efforts to work with Arcadis suppliers have focused on improving data collection practices and encouraging suppliers to offer eco-friendly alternatives.

Arcadis continues to engage its suppliers to encourage innovation and reduce climate impacts.

#### **Comment**

Percentages cited above are not tracked at the global level. Estimates are provided based on known regional efforts and initiatives to collect climate change related information.

---

## C12.1b

---

### **(C12.1b) Give details of your climate-related engagement strategy with your customers.**

#### **Type of engagement**

Collaboration & innovation

#### **Details of engagement**

Run a campaign to encourage innovation to reduce climate change impacts

#### **Size of engagement**

10

#### **% Scope 3 emissions as reported in C6.5**

0

#### **Please explain the rationale for selecting this group of customers and scope of engagement**

Arcadis also engages its clients, focusing on those with established or developing sustainability programs.

#### **Impact of engagement, including measures of success**

As each case is unique, Arcadis collaborates with its clients to identify areas where reductions can occur, working to implement change when feasible. Examples of client engagement include reduced travel, emission tracking, carbon offsets, and sustainable design. Measures of success are client and/or project specific. In the beginning, success is usually measured by the implementation of an environmental sustainability initiative. As the program develops, however, success is typically gaged by the reduction of environmental metrics (e.g., greenhouse gas emissions) and continued collaboration with the client.

### C12.3

---

**(C12.3) Do you engage in activities that could either directly or indirectly influence public policy on climate-related issues through any of the following?**

- Direct engagement with policy makers
- Trade associations
- Funding research organizations

### C12.3a

---

**(C12.3a) On what issues have you been engaging directly with policy makers?**

Focus of legislation	Corporate position	Details of engagement	Proposed legislative solution
Other, please specify (Water Conservation and Efficiency)	Support	Arcadis works directly with local, state, and national governments providing design and consultancy expertise as it relates to water conservation and efficiency. Work and guidance provided by Arcadis contributes to the development of sound policy as it relates to climate change and other environmental issues.	Arcadis supports sound water conservation and efficiency policies that reflect social, environmental, and economic conditions of the area.
Adaptation or resilience	Support	Arcadis works directly with local, state, and national governments providing design and consultancy expertise as it relates to climate adaptation resiliency. Work and guidance provided by Arcadis contributes to the development of sound policy as it relates to climate change and other environmental issues.	Arcadis supports sound climate change adaptation policies that reflect social, environmental, and economic conditions of the area.

**C12.3b**

**(C12.3b) Are you on the board of any trade associations or do you provide funding beyond membership?**

Yes

**C12.3c**

**(C12.3c) Enter the details of those trade associations that are likely to take a position on climate change legislation.**

**Trade association**

World Business Council for Sustainable Development (WBCSD)

**Is your position on climate change consistent with theirs?**

Consistent

**Please explain the trade association's position**

WBCSD is involved in a number of key processes and dialogues around the world, particularly the United Nations Framework Convention on Climate Change (UNFCCC). The WBCSD has been present at the annual Convention of Parties (COP) since 1995 and has a leading business role at COP 15 in Copenhagen in 2009. Climate change can only be resolved through cooperation that includes all elements of society, in particular between governments and business. A new global climate agreement will be essential to establishing the right framework conditions that will deliver long-term, large scale greenhouse gas (GHG) reductions. WBCSD's recommendations are based on the view that it is essential that a new international agreement on climate change is agreed in 2010 to provide a framework for climate legislation and action that offers clarity, predictability and a level-playing field for business. This should include: • A global target (cap) on emissions by 2050 and pathways to get there; • Developed country commitments to deep emissions reductions and emissions reduction plans for developing countries; • Establishing a framework that provides strong incentives for the development and deployment of the clean technologies that will be necessary to enable the world to move towards a low carbon economy; • Policy measures to promote technology innovation and diffusion; • A framework to help accelerate clean technology diffusion in developing countries; • A signal that the carbon markets will continue beyond 2012, and that a global carbon market with a price on carbon will be established; • Adaptation funding • Support for reducing emissions for deforestation and forest degradation - REDD. WBCSD believes tackling climate change requires an integrated approach that addresses the issues of competitiveness and economic sustainability, energy security, the environment and development, as well as adaptive capacity for inevitable climate impacts.

**How have you, or are you attempting to, influence the position?**

In 2014, Arcadis joined the WBCSD. Together with its members, the council applies its respected thought leadership and effective advocacy to generate constructive solutions and take shared action. The Council is made up of 192 global firms and acts as the voice of business in several bodies (e.g. UN Climate Summit, Sustainability Development Goals). ARCADIS was formally admitted into the WBCSD on the 9th of April 2014. Since then it has become actively involved in the following work streams: Water Cluster, Zero Emission Cities Sector Project, Ecosystem & Landscape Management Cluster, and Redefining Value Cross Cutting Project / Natural Capital Protocol. In November 2014, Arcadis CEO Neil McArthur participated in the WBCSD Council Meeting in Atlanta, in the United States, where WBCSD members focused on Redefining Value (moving from financial to natural and social capital) and 'Business Setting the Pace'. In 2015, Arcadis joined global world leaders at the COP in Paris, where Neil McArthur, CEO joined a panel discussion Chaired by UN-Habitat on 'The City We Need'. The purpose of the event was to engage the private sector on cities and climate change. During the event, business and city leaders alike expressed their commitment to solving urban sustainability challenges in advance of the forthcoming United Nations Conference of Housing and Sustainable Urban Development (Habitat III).

## C12.3d

---

**(C12.3d) Do you publicly disclose a list of all research organizations that you fund?**

No

## C12.3f

---

**(C12.3f) What processes do you have in place to ensure that all of your direct and indirect activities that influence policy are consistent with your overall climate change strategy?**

When engaging with organizations, research organizations, and policy makers, Arcadis reflects on its Business Control Framework to ensure our activities and outreach are consistent with our Mission, Vision, Values, and overall strategy, including that of climate change.

## C12.4

---

**(C12.4) Have you published information about your organization's response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).**

## SC. Supply chain module

---

### SC0.0

---

**(SC0.0) If you would like to do so, please provide a separate introduction to this module.**

With climate change and the need for sustainability recognized as one of today's most critical global issues, organizations have realized the importance of supporting activities that benefit the world's economic, environmental and social well-being rather than contributing to one at the expense of the others. Companies that track sustainable performance as a core business process are not only having a positive effect on the world, but also on their bottom line and longevity, both of which are ultimately strengthened as a result.

Arcadis is a leader in global design & consultancy. Our passion is to improve the quality of life and be recognized as the best in everything that we do, creating exceptional and sustainable outcomes for our clients in natural and built asset environments. We help our clients solve some of the biggest issues facing our world – such as sustainability, urbanization, asset productivity, resource scarcity, and climate change. We do that by delivering comprehensive solutions that create social, economic and environmental value for our clients and the communities in which we live and work.

To support clients who track sustainable performance metrics, Arcadis quantifies and discloses the impacts its business-related activities have on the carbon footprints of our clients. We continue to refine our inventory and gain a better perspective on how our actions impact our clients. Through innovation and collaboration, we seek to partner with our clients on a project by project basis to identify opportunities to reduce emissions that are mutually beneficial to Arcadis, our clients, and the environment.

### SC0.1

---

**(SC0.1) What is your company's annual revenue for the stated reporting period?**

	Annual Revenue
Row 1	3219000000

### SC0.2
