

Data and Dossier at one Place

Ecotoxicology laboratory + Product Stewardship Solutions

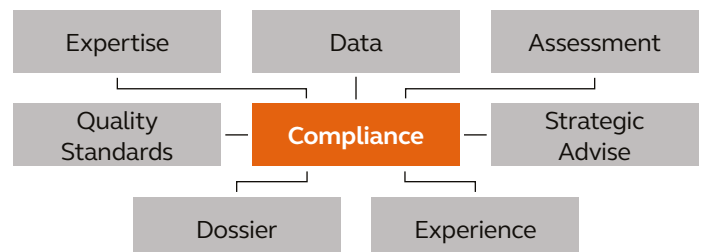

Arcadis offers dossiers for regulatory purposes like REACH, SDS, water hazard classification, ecolabel and many more: lab tests and consulting as well as preparation of the documentation from a single source.

Starting with a situation analysis we check your processes and the “Regulatory Compliance” for your products. With outsourcing mandates we take over the entire chemical management or individual elements of it. We advise you on all aspects of chemicals legislation, support you e.g. in all aspects of REACH implementation (Regulation (EC) No 1907/2006 on registration, Assessment, authorisation and restriction of chemical substances) or on questions concerning biocides (Biocidal products Regulation (EC) No 528/2012) such as applying for a licence for your biocidal products. Furthermore, our ecotoxicology laboratory shall carry out the appropriate tests to the environmentally relevant aspects of your products according to the OECD principles of good laboratory practice (GLP) or according to ISO/IEC 17025.

The Arcadis Labors have many years of experience and excellent knowledge in the implementation of customer-specific projects. Our scientists offer highly qualified, professional advice. The supervision by experts is ensured during the whole project.

Arcadis Services:

- GLP studies for aquatic ecotoxicology and physico-chemical properties according to OECD guidelines
- Development and validation of substance specific analytical methods as well as determination of the concentration tested
- Biodegradability studies (OECD 301 + 302 + 311)
- Preparation of dossiers and communication with authorities
- Preparation of MSDS, Generation of the necessary data (GLP studies)
- Ecolabel
- Classification, Labelling and Packaging (CLP) Regulation
- Water hazard classes

About Arcadis

Arcadis is the leading global Design & Consultancy firm for natural and built assets. Applying our deep market sector insights and collective design, consultancy, engineering, project and management services we work in partnership with our clients to deliver exceptional and sustainable outcomes throughout the lifecycle of their natural and built assets. We are 27,000 people, active in over 70 countries that generate €3.3 billion in revenues. We support UN-Habitat with knowledge and expertise to improve the quality of life in rapidly growing cities around the world.
